

Re: Town of Marana Pavement Preservation Program – **STREET CLOSURE**

MARANA RESIDENT:

This letter is to notify you that your street has been selected for the Town of Marana's Pavement Preservation Program. This program employs a proactive maintenance philosophy to improve and preserve the high standards of our roads. Due to the type of work being performed, you will experience temporary road closures while work is taking place.

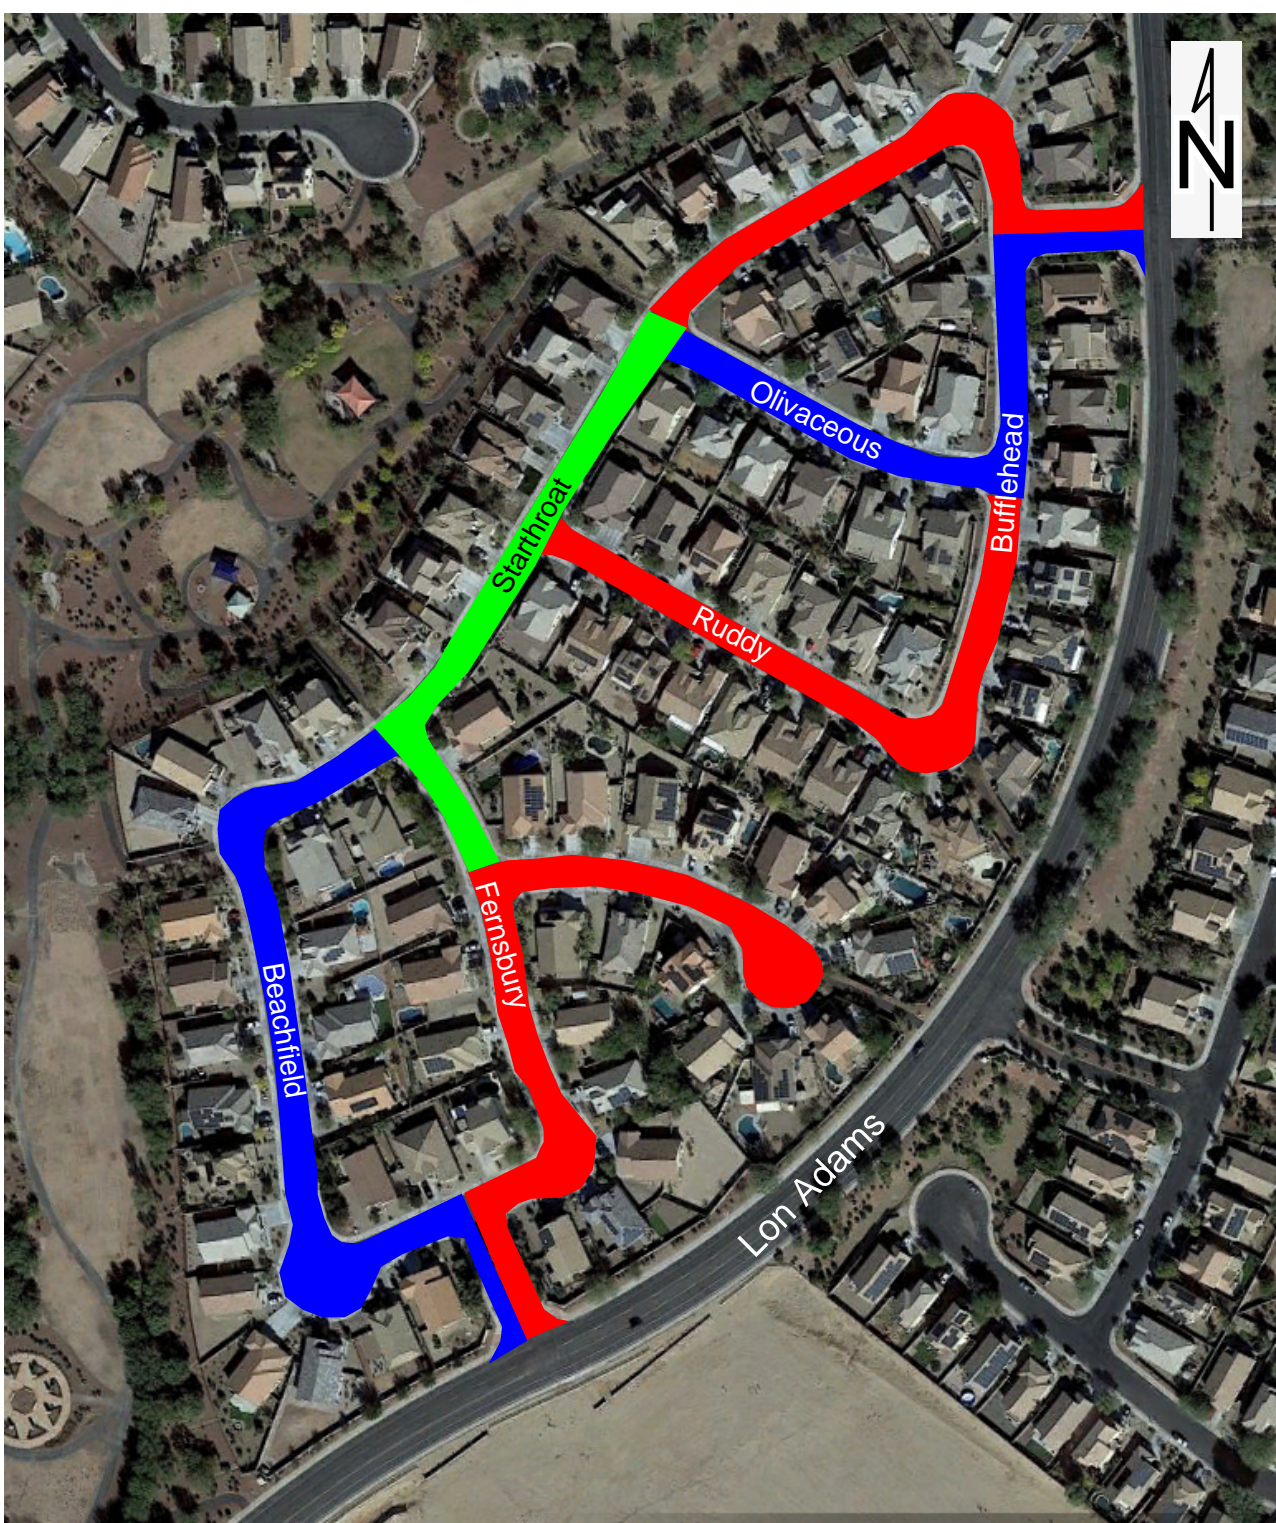

Sunland Asphalt has been contracted to perform the street maintenance project in your area. The work involves seal coating of streets within your subdivision. The seal coat is anticipated to take place on **September 18 – September 20**.

**\*\*\*IMPORTANT POLICIES TO NOTE\*\*\***

- Your road will be unavailable for travel on certain days. There will be a shuttle service to get you to and from your residence and vehicle. The service will run from 7:00 a.m. to 5:00 p.m. If there is a delay and the streets do not open at the estimated time, the shuttle will run until the streets are opened. **To contact the shuttle, please call 520-849-4178.** Please refer to the attached map to determine what day your address is affected.
- The type of treatment that will be applied to your road requires an 8 hour period of no traffic. **All vehicles must be parked off the street. Please park your vehicle on another street in the neighborhood that is not receiving treatment the same day your street is scheduled. (Please see map) The HOA has been notified and street parking will be allowed during the repaving project.** If the owner of a vehicle parked on the street is unable to be located, the vehicle is subject to towing. Please see map on the back for closure areas and dates.
- Sprinklers may not be used one full day before or after your road has been treated. Since treatments cannot be applied to wet roadways, delays may occur if moisture is present 24 hours before or after treatment has been applied.
- Trash/recycle containers must be kept off the street. If pickup is scheduled during construction hours, your trash will be serviced at the next scheduled pick-up date. In the case of a life-threatening emergency, public safety vehicles will be allowed to drive on the treated surface.
- Work cannot be performed in inclement weather. You will be notified of additional closures if the work cannot be performed on the planned date.
- Work is scheduled to be done from 7:00 a.m. to 5:00 p.m. **You will be able to access your road after 5:00 p.m. given there are no delays and all barricades have been removed.**

We understand there will be some inconvenience during this project. If we work together, we can minimize problems and finish in a timely manner with satisfying results. **If your scheduled treatment is postponed for any reason, a new notification will be sent out at a later date.**
