

# Industrial

---

Industrial customers are subject to the following rates and appropriate taxes:

- Water Flat/Minimum
- Water Consumption
- Groundwater Resource Fee
- Sewer Flat/Minimum
- Sewer Consumption
- Fire Service Fee

The water flat and fire service fees are based on the size of the meter and fire service connection, respectively. For example, a customer with a 1" water meter has a different monthly flat rate than a customer with a 2" meter, and a customer with a 4" fire service connection will have a different rate than a customer with a 6" fire service connection. This will be the same amount each month.

The water consumption and groundwater resource fee are all billed per 1,000 gallons each month. Water consumption and groundwater resource fee are flat rates regardless of water use, meaning each 1,000 gallons is billed at the same rate.

The sewer consumption fee is also a flat rate, and is calculated on the monthly water consumption. The sewer consumption will be billed the same rate per 1,000 gallons regardless of water use each month.
